

## **CY 2022 Greenhouse Gas Emissions**

Dexis Interactive Inc., doing business as Dexis Consulting Group, measured and established a baseline of its greenhouse gas (GHG) emissions for Calendar Year 2022 for U.S. facilities leased and controlled by the company.

Dexis' GHG emissions report provides measurement of its Scope 1 and Scope 2 emissions, as well as its Scope 3 emissions for CY 2022. Dexis attests that the Scope 1, 2, and 3 GHG emissions were calculated in accordance with the GHG Protocol Corporate Accounting and Reporting Standard.

In CY 2022, Dexis' Scope 1 and 2 emissions measured approximately 137.857 metric tons CO<sub>2</sub>e. Its Scope 3 emissions measured approximately 558.249 metric tons CO<sub>2</sub>e. Dexis' emissions are from the electricity used in the facilities it leases, which is commercial office space, and from employee business travel and commuting.

## **Reduction Targets**

Dexis is committed to further reduce its greenhouse gas emissions and its impact on the climate and will establish annual reduction targets beginning in 2023. Dexis has already significantly reduced its U.S. office footprint and reduced staff commuting with given its hybrid working environment. Dexis believes that establishing and meeting these short and mid-term targets will enable the company to achieve a reduction in our emissions to net-zero by or before 2030.
